

**HAVE YOU BEEN DIAGNOSED WITH  
BREAST CANCER THAT HAS SPREAD TO THE BRAIN?**

**YOU MAY BE ABLE TO TAKE PART IN THE  
PRIMROSE TISSUE STUDY**

### **WHAT IS THE PRIMROSE TISSUE STUDY?**

The PRIMROSE Tissue Study intends to collect and study tissue from patients who have breast cancer that has spread to the brain (so called Leptomeningeal Disease or Brain Metastases). We would like to understand more about these cancer cells that spread to the brain to better understand treatment options.

### **CAN I TAKE PART?**

You may be able to take part if you are 16 years or over AND have been diagnosed breast cancer that has spread to the brain.

**FOR MORE INFORMATION ON PRIMROSE TISSUE STUDY, SPEAK TO A MEMBER OF YOUR BREAST TEAM**

**TEAM EMAIL: XXXX@XXXXXXXX.XXXXXXXXXX ; TEAM TEL: XXXX XXX XXX**

### **WHAT DOES THE STUDY INVOLVE?**

If you agree to take part, you will be asked to provide consent for us to collect samples from your care team. We will only collect samples which are in storage by your care team or if it is due to be collected as part of your clinical care. This will/may include:

- 1) Pre-collected Tissue: Breast Cancer Tissue, Non-brain metastasis Tissue and Brain Metastasis Tissue
- 2) Blood and Cerebrospinal Fluid Sample Collection

This study does not require you to have any additional procedures or visit.
